-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Fremed, Inc. WO 86/06163.

Fremed, Inc. discloses a temperature detector (10) having a surface temperature sensor (18) to sense a target surface and an ambient temperature sensor (20) sensing ambient temperature and electronic processing circuits (22) for determining the temperature of the target that has been adjusted for the ambient temperature and an indicator (78) (see page 9, lines 3-25). Since the ambient temperature that the target is exposed to would necessarily be the ambient temperature that the device is exposed to the ambient sensor would inherently be measuring the temperature to which the target is exposed to. While claim 2 is considered to be directed to the intended use of the device and therefore provides no further structural limitations of the device, Fremed further states, column 1, lines 13-19, that the device is used on the human body which is biological tissue.

3. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Berman et al (4,784,149).

Berman discloses a temperature detector having a surface temperature sensor (23), an ambient temperature sensor (61) and electronic circuitry for determining the temperature of a target that has been adjusted for the ambient temperature and a display (51). The device is used to produce an accurate body tissue temperature (column 2, lines 32-50).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P Lacyk whose telephone number is 571-272-4728. The examiner can normally be reached on Mon-Fri, 8:30-5:00.
